

PolyMinder 2.0[®]

*Fully-blended polymer, ready-to-use in 10 seconds. No mixing, aging, set-up or clean-up.
Precision control over all variables.*

Robust, reliable and user friendly unit that requires minimal maintenance.

Supported by CEC service technicians.

Significant savings from lower polymer use.

Each system is custom-designed and calibrated to meet the unique needs of the client.

Welcome to the newest technology for polymer management.

PolyMinder 2.0[®]

from CleanEarth Corporation.

"Every high-volume polymer user should take a serious look at PolyMinder technology from CleanEarth Corporation."

Bob O'Dette, M.S., P.E.
TDEC - Division of Water Resources

YEARS OF EXPERIENCE.....

Polymer blending has always been a necessary evil. It’s been inefficient, unpredictable, costly, subject to frequent downtime, a maintenance nightmare and incredibly messy. But, there really hasn’t been a good solution – only different packaging of the same pumps, plumbing and mixing elements. UNTIL NOW!

CleanEarth Corporation set out to remedy the situation. Combining years of experience in industrial water treatment with the help of many good friends in municipal wastewater plants, CleanEarth applied proven technology to develop a bulletproof solution for polymer blending. The result is efficient, predictable polymer blending with high uptime, excellent cost savings and minimal operator interaction. The PolyMinder 2.0 system consistently provides a precision blend without waste or seasonal efficiency fluctuations.

ALLOWED USTO DEVELOP THE BEST POLYMER BLENDING SYSTEM

For the OPERATOR, the PolyMinder 2.0 system means reliable, low maintenance blending that can be easily and precisely adjusted to accommodate changes in the waste stream. No more rebuilding metering pumps every time you start up or lost time due to clogged lines and over blends. No fish eyes, belt blinding or tiny springs and ceramic ball checks. Prompt service and support are just a phone call away.

For the PLANT MANAGER, PolyMinder 2.0 offers consistency throughout the year, better efficiency, lower polymer usage and less down time. Routine maintenance and service are handled through our contract as are ongoing support and training.

For the BUDGET MANAGER, ACCOUNTANT or CFO, PolyMinder 2.0 typically results in a 15%+ reduction in polymer use. This can result in significant savings over time.

PolyMinder 2.0 was officially launched at TDEC’s Environmental Show of the South in Chattanooga, TN. Many TDEC dignitaries stopped by to admire the eye-catching new equipment.

CleanEarth will ensure that the PolyMinder 2.0 is a WIN-WIN. Clients pay nothing up front. The contract can be structured as a rental, long term operating or capital lease – or as a “percentage of savings” agreement. The Return-On-Investment is substantial, immediate and recurring.
